

PEPTOCOMPLEX

Mixture of casein and meat peptones

DESCRIPTION

Peptocomplex is a result of a mixture of peptones obtained from the pancreatic digestion of casein, and the peptic digestion of meat. It is excellent for the cultivation of many microorganisms and for general culture work.

TYPICAL ANALYSIS

Total Nitrogen (TN)	12.6 %
Amino Nitrogen (AN).....	3.5 %
AA/AT x 100.....	27.7
Total proteins	80 %
Ash	8.6%
Sodium Chloride	5.1%
pH (2 % solution).....	7.0
Performances in microbiological culture media....	passes test

Packaging

4123102 Peptocomplex 500 g
